

In the Specification:

[000036] As shown in Figures 8 and 9, heat source basin support 76 includes a flat upper face [[82]] 100 defined by an annular rim [[83]] 102 and a plurality of support legs 80. Each support leg 80 includes a raised support portion [[84]] 104 raised above the level of face 82. Raised support portion 84 provides a support surface for heat source basin 36 thereon. Each raised support portion 84 radiates outwardly from about the center of heat source basin support 76, curves over and around rim 83 and extends downwardly into a leg portion 78 for supporting heat source basin support 76 inside body 26.

Respectfully submitted,
